OBJECTIVE

CS graduate pursuing MCA in AI (2027), with hands-on project experience in Python, APIs, and data pipelines. Active on LeetCode for DSA practice. Strong fundamentals in algorithms, OOP, and system design basics - looking to contribute as a Software Engineering Intern.

EDUCATION

M.C.A – Artificial Intelligence | July 2025 – July 2027 (Ongoing)

Jain (Deemed-to-be University) - (Online)

B.Sc – Computer Science | **CGPA: 8.3** | June 2021 – June 2024

KPR College of Arts, Science and Research, Coimbatore, Tamil Nadu

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++

Database: SQL Basics

Gen AI & LLMs: Gemini API, Prompt Engineering, LLM Integration

Core CS: Data Structures, Algorithms, Object-Oriented Programming (OOP)

Web & APIs: HTML5, CSS3, JavaScript (ES6+), REST API, JSON

Data, ML Tools: NumPy, Pandas, Matplotlib, K-Means Clustering, Streamlit, PyMuPDF, Weka.

PROJECTS

AI PDF Summarizer - Python | Gemini API | Streamlit | PyMuPDF

- Engineered a full-stack document processing pipeline that extracts, transforms, and delivers structured summaries from unstructured PDF data using Google Gemini 2.5 Flash LLM.
- Designed a modular backend architecture separating PDF extraction (PyMuPDF), prompt construction, and API response rendering - ensuring clean separation of concerns and maintainability.
- Built an interactive frontend using Streamlit with real-time API response rendering, enabling end-to-end document processing without any coding knowledge required.

Unsupervised Machine Learning: Customer Segmentation - Weka | Machine Learning

- Built a data processing pipeline on a 5,000+ record dataset, applying feature normalization and K-Means Clustering to classify customers into distinct segments.
- Evaluated cluster quality using inertia and silhouette scoring, optimising K value for best segmentation accuracy.

Real-Time Weather Forecasting System JavaScript (ES6+) | REST API | JSON | HTML | CSS3

- Engineered a real-time data pipeline that accepts user input, constructs dynamic REST API requests, and parses JSON responses to render live weather data with minimal latency.
- Implemented error handling and dynamic DOM manipulation for reliable performance across varying network conditions, with a responsive UI built in HTML5/CSS3.

CERTIFICATIONS & HONOURS

- Infosys Springboard Virtual Internship 7.0 - Artificial Intelligence Track | Completed 14 courses in AI, ML, NLP and Deep Learning.
- Cloud Computing - NPTEL
- Deloitte Data Analytics Job Simulation – Forage | Analysed patterns and delivered data-driven insights reports.
- Secretary, Zerone – Department Association (2022–2024): Led events, managed teams, and coordinated academic activities across semesters.
